

Trees

Thuja occidentalis – Northern White Cedar/Arborvitae (thrives in higher pH soils)

Salix Babylonica – Babylon/Weeping Willow

Taxodium distichum – Bald Cypress (takes briny water)

Salix nigra – Black Willow

Picea mariana – Black Spruce (thrives in lower pH soils)

Quercus macrocarpa -Burr Oak (Hard to believe, but there it was)

Fraxinus nigra – Black Ash (I wouldn't plant because of Emerald Ash Borer)

Acer negundo – Box Elder (right now it has been in standing water for weeks, outside my office/Kestrel on 9 Mile Creek)

Populus deltoides – Dogtooth Cottonwood

Fraxinus pennsylvanica – Green Ash (I wouldn't plant because of Emerald Ash Borer)

Larix laricina – Eastern Larch (thrives in lower pH soils)

Acer rubrum – Red/Swamp Maple

Nyssa biflora – Swamp Tupelo

Quercus bicolor – Swamp White Oak

Shrubs

Alnus incana – Alder

Vaccinium angustifolium – Blueberry (thrives in lower pH soils)

Cephalanthus occidentalis – Buttonbush

Potentilla fruticosa – Bush Cinquefoil/Potentilla (thrives in higher pH soils)

Sambucus canadensis – American Elderberry (right now it has been in standing water for weeks, outside my office/Kestrel on 9 Mile Creek)

Amorpha fruticosa – Indigobush

Myrica pensylvanica - Northern Bayberry (thrives in low pH soils)

Salix exigua – Sandbar Willow

Hypericum perforatum – St. Johnswort

Symphoricarpos occidentalis – Western Snowberry
